

## We are looking for REAL HEROES - Show us what you're made of!

Rodopi Blades, headquartered in Düsseldorf, is an international service partner for the assessment, maintenance, repair and overhaul of rotor blades on wind turbines. The well-rehearsed team of experts with many years of experience and comprehensive know-how stands for high performance, flexibility and quality work.

For further support, we are looking from now on for a:

### **Rotor Blade Technician in Rostock (m/f)**

#### **Your tasks:**

- Professional assessment, maintenance and servicing of rotor blades
- Repairs on assembled rotor blades and on disassembled rotor blades on the ground
- Performance of professional lightning protection measurements
- Carrying out maintenance work (screw connections, components, oil)
- Operation of working platforms and rotor blade drive systems
- Preparation of service reports and documentation of work carried out

#### **Your qualifications:**

- Completed craft training or comparable professional experience

#### **Furthermore, you bring along:**

- Good technical understanding
- Knowledge in the field of fibre composite technology or lamination of GRP
- High ability to work in a team
- Care and reliability
- Fluent knowledge of German or Greek

#### **Your benefits at RODOPI:**

- Trainings and courses with partners & at the RODOPI Academy
- Regulated working hours and rest periods
- Attractive payment according to collective agreement incl. payment of surcharges
- Opportunities for advancement are given with appropriate aptitude
- RODOPI as a strong partner at your side

Are you interested in an exciting and attractively paid job in an international environment? Then send us your application by e-mail to Mr. Mouzafer Ismailoglou ([career@rodopi.de](mailto:career@rodopi.de)). Please indicate your earliest starting date and salary expectations. Our office in Greece will be happy to answer your questions by phone at ☎ **0030 25410 22000**.
